

Scrumptious No Sugar Carrot Cake Pancakes + Kid-Made Spiced Cream Cheese Butter

By Erin Fletter

Prep Time 20 / Cook Time 8 / Serves 4 - 6

Shopping List

- FRESH
- 2 to 3 carrots
- DAIRY AND EGGS
- 1 C plain yogurt ****(see allergy subs below)****
- 1/4 C heavy cream ****(see allergy subs below)****
- 1/4 C cream cheese ****(see allergy subs below)****
- 2 eggs ****(see allergy subs below)****
- PANTRY
- 1/2 C raisins
- 1/4 C unsweetened applesauce
- 1 C all-purpose flour ****(see allergy subs below)****
- 1 1/2 tsp ground cinnamon
- 1/2 tsp salt
- 1 tsp baking powder
- 1 pinch ground cinnamon
- honey, to taste
- HAVE ON HAND

- water to cover raisins
- butter/oil/nonstick spray for pan

Fun-Da-Mentals Kitchen Skills

grate: to reduce food, like a carrot, to very small shreds or pieces of the same size by rubbing it on a tool with an outside surface that has holes with cutting edges (a grater).

wet vs dry: to mix wet and dry ingredients separately before combining them: dry ingredients are flours, leavening agents, salt, and spices; wet ingredients are those that dissolve or can be dissolved (sugar, eggs, butter, oils, honey, vanilla, milk, and juices).

whisk: to beat or stir ingredients vigorously with a fork or whisk to mix, blend, or incorporate air.

shake: to rapidly and vigorously move a covered container filled with food up and down and side to side to combine ingredients and create a different consistency, such as shaking whipped cream to make butter.

stir: to mix together two or more ingredients with a spoon or spatula, usually in a circle pattern, or figure eight, or in whatever direction you like!

Equipment

- Saucepan
- Nonstick skillet
- Large mixing bowls (2)
- Strainer
- Grater
- Dry measuring cups
- Liquid measuring cup
- Measuring spoons
- Whisk
- Wooden spoon
- Pancake turner
- Large jar or container + tight-fitting lid

Ingredients

Scrumptious No Sugar Carrot Cake Pancakes

- 1/2 C raisins
- 1/2 C grated carrot (2 to 3 carrots)
- 1 C plain yogurt ******(for DAIRY ALLERGY sub dairy-free/nut-free plain yogurt)******
- 2 eggs ******(for EGG ALLERGY sub 1/2 C puréed silken tofu)******
- 1/4 C unsweetened applesauce
- 1 C all-purpose flour ******(for GLUTEN ALLERGY sub gluten-free/nut-free all-purpose flour)******
- 1 1/2 tsp ground cinnamon
- 1/2 tsp salt
- 1 tsp baking powder
- butter/oil/nonstick spray for pan

Kid-Made Spiced Cream Cheese Butter

- 1/4 C heavy cream ******(for DAIRY ALLERGY sub softened store-bought dairy-free/nut-free butter)******
- 1 pinch ground cinnamon
- 1/4 C cream cheese, softened ******(for DAIRY ALLERGY sub dairy-free/nut-free cream cheese)******
- honey, to taste

Food Allergen Substitutions

Scrumptious No Sugar Carrot Cake Pancakes

Dairy: Substitute dairy-free/nut-free plain yogurt

Egg: For 2 eggs, substitute 1/2 C puréed silken tofu.

Gluten/Wheat: Substitute gluten-free/nut-free all-purpose flour.

Kid-Made Spiced Cream Cheese Butter

Dairy: Substitute softened store-bought dairy-free/nut-free butter for the heavy cream (no shaking necessary). Add the cream cheese and honey to the dairy-free butter.

Instructions

Scrumptious No Sugar Carrot Cake Pancakes

plump + drain

Add **1/2 cup raisins** to a saucepan on your stovetop with enough water to cover about an inch above the raisins. Simmer over low heat for about 5 minutes until the raisins have plumped and almost doubled in size. Remove from the heat and let cool. Drain from the water and add the raisins to a large bowl. Let them sit and cool some more while you make the rest of your pancakes.

grate + mix + whisk

Have your kids grate **2 to 3 carrots** to measure 1/2 cup and set to the side. Then measure and mix together **1 cup of yogurt**, **2 eggs**, and **1/4 cup of applesauce** to the bowl with the cooled, plumped raisins. Have your kids whisk vigorously until the raisins begin to fall apart. (You can't taste the flavor or texture of the raisins—they are just a way to sweeten the pancakes without any processed sugars!)

combine + pour

Have your kids measure and combine the dry ingredients in a new bowl: **1 cup flour**, **1 1/2 teaspoons cinnamon**, **1/2 teaspoon salt**, and **1 teaspoon baking powder**. Pour the wet ingredients into the dry ingredients. Add the grated carrots to the mixture and mix with a wooden spoon only until incorporated, don't over mix!

brush + drop + flip

Heat a nonstick skillet on your stovetop over medium heat, and brush the skillet with a touch of butter, oil, or nonstick spray. Then drop **1 tablespoon dollops of batter** onto your preheated skillet. Next, cook the pancakes on the first side for about 3 to 4 minutes, until the top starts to bubble a tiny bit and the edges start to cook. Flip the pancakes and cook for another 3 to 4 minutes. Makes about 24 coin-sized pancakes. They're delicious topped with our **Spiced Cream Cheese Kid-Made Butter!**

Kid-Made Spiced Cream Cheese Butter

combine + shake

Have your kids combine **1/4 cup heavy cream** and **1 pinch of cinnamon** into a plastic container or jar with a tight-fitting lid and shake, shake, shake! The butter needs to be shaken for at least 5 minutes. It will seem like it will never become butter, but stick with it! Then, when you hear a "sloshing" sound (the buttermilk separating from the butterfat), you've just made butter!

drain + stir

When the buttermilk and butter have separated, drain the buttermilk from the solid butter. Into your butter, stir **1/4 cup soft cream cheese** and a bit of **honey** to taste. Top pancakes, like our **Scrumptious No Sugar Carrot Cake Pancakes**, with your spiced butter and some extra honey, and enjoy!

Featured Ingredient: Carrots!

Hi! I'm Carrot!

"I'm at the root of this recipe! Get it? Root? Carrots are root vegetables! We grow up in dark and cozy soil. Our leaves get plenty of sunshine, though. If you grow us, it's so satisfying to pull us out of our underground home and know you'll be tasting our crunchy sweetness very soon. But you may want to wash us first! You can eat carrots raw or cook them first. Either way, you'll enjoy our flavor, texture, and color in salads, savory dishes, and desserts, like carrot cake!"

History

Before carrots were orange, they were purple, red, white, and yellow. In the 16th century (after the Middle Ages), Dutch carrot growers invented the orange carrot in honor of the House of Orange, the Dutch Royal Family (for Kings and Queens). They did this by crossbreeding pale yellow carrots with red carrots. Carrots soon caught on in England as both a food and a fashion accessory. For example, it's said that ladies in the 1600s would decorate their hats with carrot tops instead of feathers!

The carrots we eat today were domesticated from a wild carrot native to Europe and southwestern Asia. No one knows exactly how old carrots are, but history traces them back about 5,000 years. They were mistaken for parsnips before the carrot was identified as a distinct vegetable. Carrots and parsnips are related but from different families. Parsnips are white and look a lot like carrots. They're also root vegetables!

When carrots were first grown many hundreds of years ago, farmers prized them for their aromatic leaves and seeds—not just the roots!

According to some sources, carrots are the second most popular vegetable in the world, behind just one other. Can you guess what's number one? Potatoes!

The longest carrot ever recorded was over 20 feet long! (The measurement included the taproot's long, skinny end.) The heaviest carrot recorded weighed over 22 pounds!

You may think rabbits love carrots naturally, and this is largely because of the popularity of the wise-cracking and charming cartoon rabbit character named Bugs Bunny. We see Bugs Bunny munching on a carrot in most scenes. In reality, if a rabbit ate a whole carrot, it would be like you or me eating 20 carrots in one sitting! Way too much! Here's another fun fact: The voice of Bugs Bunny, Mel Blanc, reportedly did not like carrots at all.

Anatomy & Etymology

Carrots belong to the Umbelliferae family, named for their resemblance to an umbrella when their leafy green stems are attached. This family includes celery, parsnip, fennel, dill, and coriander.

Carrots are root vegetables, meaning they grow underneath the ground. Their feathery leaves grow above the ground. Can you think of other root vegetables? A few of them are beets, onions, turnips, potatoes, radishes, parsnips, fennel, garlic, and jicama.

You can eat every part of the carrot. Typically we eat the root part of the plant, but the stems and leaves are edible, too! A carrot's root can grow anywhere from 2 to 20 inches long before it's picked!

Carrots like to grow in cooler climates, not tropical, hot places. For this reason, they are usually grown in the autumn, winter, and spring months.

Baby carrots sold in grocery stores started as long carrots that were sliced and tumbled into smaller pieces to make them "baby-sized."

Carrot seeds are tiny. Find a teaspoon. How many carrot seeds do you think will fit inside? About 2,000!

A carrot plant will live for two years, meaning new crops need to be planted from seed every two years.

There are two main classes of carrots: Western and Eastern. The Western class includes four types, classified by their root shape: Chantenay, Danvers, Imperator, and Nantes. Several cultivars (varieties created by selective breeding) exist under each type. Many varieties have different colors than the typical orange. How many colors have you seen? The next time you're in the grocery store, look for these diverse carrots.

The English word "carrot" comes from the Greek word "karoton."

How to Pick, Buy, & Eat

One large carrot or a handful of baby carrots counts as one vegetable serving. Aim for three servings of veggies a day for kids and five servings for adults.

Carrots can be eaten raw, roasted, juiced, boiled, mashed, or steamed. However, they are most nutrient-dense when cooked and eaten with fat like butter or oil.

When you eat a carrot, how does it taste? Modern carrots have been bred to be sweet, which is why we often use them in baked goods like carrot cake! On the other hand, ancient carrots were bitter, not sweet. Look for firm, brightly colored carrots with smooth, firm skin. Carrots that are limp or black near the top are not fresh.

Thicker carrots may be older and tougher to eat, whereas thinner carrots are typically younger, fresher, and sweeter.

Store carrots in the crisper drawer of your refrigerator, where they will keep for a few weeks!

One of the tastiest, easiest ways to cook carrots is to toss them with melted butter, salt, honey, and garlic, then roast them at 425 F for 20 minutes.

You can grate raw carrots and add them to salads or chop them to add to soups or stews. If you boil or steam carrots, you then puree them to add to breads, cookies, cakes, or even tomato sauce to sweeten it.

Carrots add natural sweetness to whatever recipe they're in (and a pretty orange color, too!).

Nutrition

Eyes! The color of a fruit or vegetable tells us what nutrient it contains (nature is amazing!). Orange vegetables and fruits have a particular nutrient called beta carotene. Beta carotene was named for the carrot itself! This nutrient converts to vitamin A inside the body, which is good for our eyes! Studies have shown that only three percent of beta carotene is released from the raw vegetable when we digest it. But this percentage can be improved when we juice or puree raw carrots or cook them with fat like butter or

oil. Carrots have the most beta carotene of any vegetable!

Teeth! The crunchiness of carrots helps clean the plaque off your teeth and gums, just like your toothbrush!

Of course, this doesn't mean eating a carrot at the end of the day can substitute for brushing your teeth!

Carrots also have minerals that protect the teeth.

Purple carrots include anthocyanin, an antioxidant, just like purple eggplants, blueberries, and other colorful fruits.

As with all vegetables, eating carrots helps protect us from getting sick!
